

NOUN EXAMS

A sprayer machine performs the following functions excepts
Maximize the amount of water use of mixing chemicals

Property not common with basic machines is
Mechanical advantage

Which of this is not a fixed cost
Repairs and maintenance

The major processing work of the combine harvester is
Threshing and cleaning of grains

Gears are meant to do the following
All of the above.

The aims of agricultural mechanization include the following except
Staffing problem

Secondary tillage operation is used for except
Destroy small insects

Which of this is not a primary tillage equipment
Spring-tine cultivator

An example of a size reduction equipment are
Bar mill -->Hammer mill

Which of this is not a tillage operation
All the above?

Farm power can be transmitted by
All of the above

Which of the following is not a machine
The try square

The combine harvester does the work of
Harvesting and processing grain crops??

A sprayer machine performs the following functions excepts
Maximize the amount of water use of mixing chemicals??

The operation of four-stroke cycle engine can be found in
All of the above

The following are examples of a machine except
Combustion engine

Types of spraying equipment include except
Wind vane sprayer -->Staffing problem -->The ease of communication
between staff segments

Which of this does not defines agricultural mechanization

A special field of agricultural engineering

Types of spraying equipment include except
Mist blower

Which of the following is not a machine
The try square

The following are examples of a machine except
Combustion engine

A machine is an appliance or equipment that uses
Power

Which of the following is not a machine
The try square

Which of this is not considered as part of fixed cost
Fuel
