Question  
Fungi belong to which of these groups?

Answer  
eukaryotes

Question  
Fungi can be said to be mainly ----- organism

Answer  
multicellular

Question  
Which of these is true about cell division in fungi? Cell division is by

Answer  
mitosis and meiosis

Question  
Which of these organism is not an example of fungi?

Answer  
hydra

Question  
The study of fungi is referred to as

Answer  
mycology

Question  
Algae belong to which of these groups of organism?

Answer  
protocist

Question

Algae have undifferentiated body called

Answer  
thallus

Question  
Algae can best be classified as ----- organism

Answer  
photosynthetic

Question  
Which of these is not a green algae?

Answer  
phylum phaeophyta

Question  
Which of these is not classified as algae?

Answer  
amoeba

Question  
The fungus used as food by humans is

Answer  
Agaricus

Question  
The primitive form of sexual reproduction in some bacteria is known as nuclear recombination

Answer  
genetic recombination

Question  
A pinnately compound leaf is that which

Answer  
the rachis bears a number of leaflets in alternate manner

Question  
Water is absorbed in plants by the

Answer

root hairs

Question

The stem of some plants serve all but one of these functions

Answer

barrier

Question

The function of the stomata in a leaf is

Answer

to regulate the flow of carbon-dioxide, oxygen and water

Question

Obstacles to self-pollination is called

Answer

dichogamy

Question

The edible part of most fruits is the

Answer

mesocarp

Question

Which of the following is a multiple fruit?

Answer

Okra

Question

Which of these fruits is a capsule?

Answer

cotton

Question

Excretion in living things is resultant from

Answer

cell activities in the cytoplasm

Question

Which of the following is not a character of living things?

Answer

crying

Question

Growth in a multicellular organism

Answer

increases the number of its cells

Question

Growth in a unicellular organism

Answer

increases its protoplasm

Question

Every living cell is made up of

Answer

protoplasm

Question

There are ----- aspects of metabolism

Answer

two

Question

Metabolism is

Answer

chemical process

Question

Metabolism is a process carried out by

Answer

leaf

Question

The main reason for assimilation is to

Answer

maintain life

Question

Which of these statements is most correct?

Answer

Animals depend on plants for food

Question

Fungi belong to which of these groups?

Answer

eukaryotes

Question

Fungi can be said to be mainly ----- organism

Answer

multicellular

Question

Which of these is true about cell division in fungi? Cell division is by

Answer

mitosis and meiosis

Question

Which of these organism is not an example of fungi?

Answer

hydra

Question

The study of fungi is referred to as

Answer

mycology

Question

Algae belong to which of these groups of organism?

Answer

protocist

Question

Algae have undifferentiated body called

Answer

thallus

Question

Algae can best be classified as ----- organism

Answer

photosynthetic

Question

Which of these is not a green algae?

Answer

phylum phaeophyta

Question

Which of these is not classified as algae?

Answer

amoeba

Question

The fungus used as food by humans is

Answer

Agaricus

Question

The primitive form of sexual reproduction in some bacteria is known as nuclear recombination

Answer

genetic recombination

Question

A pinnately compound leaf is that which

Answer

the rachis bears a number of leaflets in alternate manner

Question

Water is absorbed in plants by the

Answer  
root hairs

Question  
The stem of some plants serve all but one of these functions

Answer  
barrier

Question  
The function of the stomata in a leaf is

Answer  
to regulate the flow of carbon-dioxide, oxygen and water

Question  
Obstacles to self-pollination is called

Answer  
dichogamy

Question  
The edible part of most fruits is the

Answer  
mesocarp

Question  
Which of the following is a multiple fruit?

Answer  
Okra

Question  
Which of these fruits is a capsule?

Answer  
cotton

Question  
Excretion in living things is resultant from

Answer  
cell activities in the cytoplasm

Question

Which of the following is not a character of living things?

Answer

crying

Question

Growth in a multicellular organism

Answer

increases the number of its cells

Question

Growth in a unicellular organism

Answer

increases its protoplasm

Question

Every living cell is made up of

Answer

protoplasm

Question

There are ----- aspects of metabolism

Answer

two

Question

Metabolism is

Answer

chemical process

Question

Metabolism is a process carried out by

Answer

leaf

Question

The main reason for assimilation is to

Answer  
maintain life

Question  
Which of these statements is most correct?

Answer  
Animals depend on plants for food

Question  
The fungus used as food by humans is

Answer  
Agaricus

Question  
The primitive form of sexual reproduction in some bacteria is known as nuclear recombination

Answer  
genetic recombination

Question  
A pinnately compound leaf is that which

Answer  
the rachis bears a number of leaflets in alternate manner

Question  
Water is absorbed in plants by the

Answer  
root hairs

Question  
The stem of some plants serve all but one of these functions

Answer  
barrier

Question  
The function of the stomata in a leaf is

Answer  
to regulate the flow of carbon-dioxide, oxygen and water

Question  
Obstacles to self-pollination is called

Answer  
dichogamy

Question  
The edible part of most fruits is the

Answer  
mesocarp

Question  
Which of the following is a multiple fruit?

Answer  
Okra

Question  
Which of these fruits is a capsule?

Answer  
cotton

Question  
Fungi belong to which of these groups?

Answer  
eukaryotes

Question  
Fungi can be said to be mainly ----- organism

Answer  
multicellular

Question  
Which of these is true about cell division in fungi? Cell division is by

Answer  
mitosis and meiosis

Question  
Which of these organism is not an example of fungi?

Answer  
hydra

Question  
The study of fungi is referred to as

Answer  
mycology

Question  
Algae belong to which of these groups of organism?

Answer  
protocist

Question  
Algae have undifferentiated body called

Answer  
thallus

Question  
Algae can best be classified as ----- organism

Answer  
photosynthetic

Question  
Which of these is not a green algae?

Answer  
phylum phaeophyta

Question  
Which of these is not classified as algae?

Answer  
amoeba

Question  
Excretion in living things is resultant from

Answer  
cell activities in the cytoplasm

Question

Which of the following is not a character of living things?

Answer

crying

Question

Growth in a multicellular organism

Answer

increases the number of its cells

Question

Growth in a unicellular organism

Answer

increases its protoplasm

Question

Every living cell is made up of

Answer

protoplasm

Question

There are ----- aspects of metabolism

Answer
