

Question

_____ is a computer program that accepts a source program in one high-level language, and translates the entire user's program into an equivalent object code.

Answer

Compiler

Question

In principles of good Programming the characteristic that emphasize the Optimal utilization of resources is:

Answer

Efficiency

Question

Principles of good Programming does not include:

Answer

Viability

Question

... is the ability to create procedures that can operate on objects of different types.

Answer

Polymorphism

Question

State whether the statement true or false. i) Function procedures are public by default. ii) Function procedure return values whereas sub procedures cannot return a value to the calling procedure.

Answer

True, True

Question

Every optional argument in the procedure definition must specify a/an _____ value which must be a constant expression.

Answer

Default

Question

The function procedures are _____ by default.

Answer

Public

Question

The member "clear" of the Array class that sets a range of array elements to zero, false or null reference is a ____ method.

Answer

Shared

Question

Which of the following Loop structure is not supported by VB.Net?

Answer

Do While

Question

Which of the following is not true about Program documentation?

Answer

provides operating instructions to the system analyst.

Question

_____ are system software to facilitate editing of text and data

Answer

Editors

Question

Computers that combine both measuring and counting are called ____ computers

Answer

Hybrid

Question

_____ computers operates essentially by counting

Answer

Digital computer

Question

What is the most common tool used to restrict access to a computer system?

Answer

Passwords

Question

A modem is connected to:

Answer

a telephone line

Question

Which of the following is the smallest storage?

Answer

None of these

Question

A DVD is an example of _____

Answer

optical disc

Question

On-line real time systems become popular in _____ Generation

Answer

Third Generation

Question

The primary function of the _____ is to set up the hardware and load and start an operating system:

Answer

BIOS

Question

A _____ is a microprocessor -based computing device.

Answer

personal computer

Question

SMPS stands for_____

Answer

Switched mode Power Supply

Question

_____ translates and executes program at run time line by line

Answer

Interpreter

Question

A computer program that translates one program instructions at a time into machine language is called ____

Answer

Interpreter

Question

A dedicated computer ____

Answer

is assigned one and only one task

Question

Personal computers use a number of chips mounted on a main circuit board. What is the common name for such boards?

Answer

Motherboard

Question

Who designed the first electronics computer - ENIAC?

Answer

J. Presper Eckert and John W Mauchly

Question

In latest generation computers, the instructions are executed

Answer

Both sequentially and in parallel

Question

Microprocessors as switching devices are for _____ generation computers

Answer

Fourth Generation

Question

Chief component of first generation computer was ____

Answer

Vacuum Tubes and Valves

Question

Which of the following is a first generation computer?

Answer

EDSAC

Question

_____ is a computer program that accepts a source program in one high-level language, and translates the entire user's program into an equivalent object code.

Answer

Compiler
