

Which of the following is NOT a class of error in computer programming?
Typographical errors

Chief component of first generation computer was____
Vacuum tubes and Valves

Which of the following is NOT an advantage of mechanical method of data processing?
Ease of correcting errors

The computer size was very large in _
First Generation Computer

Microprocessors as switching devices are for ____ generation computers
Fourth Generation

The following are characteristics of a computer EXCEPT ____
cyclic

One of the following is NOT a feature of the computer methods of carrying out data processing.
Errors cannot be easily and neatly corrected

Which of the following computer resources is most likely to be a shared common resource in a networking environment?
Printers

1. Which part of the computer is directly involved in executing the instructions of the computer program?
The processor

2. Which of the following generation of computer saw the use of large-scale integration?
fourth generation

3. Second Generation computers were developed during____
1954-1962

4. Which of the following is a Digital Equipment?
Cell phone

5. Which of the following data processing method is cumbersome, tiresome, boring, frustrating and time consuming?
Manual method

6. _ computers operates essentially by counting
Digital computer

7. ALU and Control Unit jointly known as____
CPU

8. Magnetic core-based memory technology is accessed in ----- order
Sequential

9. ____ computer attempts to gain the advantage of both the digital and the analog elements in the same machine.
Hybrid computer

10. Which of the following is NOT an advantage of personal computer?

Very fragile and complex to handle

_____ assists the CPU in its number-crunching activities.
Math coprocessor slot

All the following are characteristic of a computer except
time consuming

SMPS stands for _____
Switched Mode Power Supply

A computer infected by virus can experience the following except
Over heating

Chief component of first generation computer was _____
Vacuum tubes and Valves

_____ is referred to as processed data or a meaningful statement e.g. Net
pay of workers, examination results of students, list of successful
candidates in an examination or interview etc
Information

In which computer generation do we have computers that were large in
size?
First generation computer

_____ translates and executes program at run time line by line
Interpreter

Who designed the first electronics computer & , - € ENIAC?
J. Presper Eckert and John W Mauchly

The computer size was very large in _____
First Generation Computer

A dedicated computer _____
is assigned one and only one task

Which of the following is a first generation computer?
EDSAC

SMPS stands for _____
Switched mode Power Supply

Personal computers use a number of chips mounted on a main circuit board.
What is the common name for such boards?
Motherboard

Microprocessors as switching devices are for _____ generation computers
Fourth Generation

_____ translates and executes program at run time line by line
Interpreter

In latest generation computers, the instructions are executed _____
Both sequentially and in parallel

_____ is computer software designed to operate the computer
hardware and to provide platform for running application software

a.

System software

To access properties of an object, the mouse technique to use is

Right-clicking

Which smaller unit of the CPU directs and coordinates all activities within it and determines the sequence in which instructions are executed, sending instructions sequence to other smaller unit.

All of the above

A computer program that translates one program instructions at a time into machine language is called ____
Interpreter

Chief component of first generation computer was ____
Vacuum Tubes and Valves

Who designed the first electronics computer " ENIAC?
J. Presper Eckert and John W Mauchly

Which of the following is NOT an advantage of mechanical method of data processing?
Ease of correcting errors

Which of the following methods of data processing involves the use of typewriter?
mechanical method

Touch Screen is_____
Both a&b

The power supply unit of computer converts high voltage to _____
voltage.
Low

Which is not a basic function of a computer?
Copy text

To prevent the loss of data during power failures, use _____
Uninterruptible Power Supply

The computing system is made up of the following EXCEPT
The computer analyst

Every optional argument in the procedure definition must specify a/an _____ value which must be a constant expression.
Default

Which of the following statement is not true? _____
Sub-procedures returns a value to the calling procedure

In principles of good Programming the characteristic that emphasize the Optimal utilization of resources is _____
Efficiency

Principles of good Programming does not include _____.
Viability

Which of the following Loop structure is not supported by VB.Net? _____
Do While

_____ is a computer program that accepts a source program in one high-level language, and translates the entire user's program into an equivalent object code.
Compiler

The member "clear" of the Array class that sets a range of array elements to zero, false or null reference is a _____ method.
Shared

Which of the following is not true about Program documentation? _____
provides operating instructions to the system analyst.

_____ is the ability to create procedures that can operate on objects of different types.
Polymorphism

The function procedures are _____ by default.
Public

The primary function of the _____ is to set up the hardware and load and start an operating system:
BIOS

A modem is connected to:
a telephone line

Which of the following is the smallest storage? _____
None of these

_____ are system software to facilitate editing of text and data
Editors

On-line real time systems become popular in _____ Generation
Third Generation

A DVD is an example of _____
optical disc

A _____ is a microprocessor-based computing device.
personal computer

Computers that combine both measuring and counting are called _____
computers
Hybrid

What is the most common tool used to restrict access to a computer system? _____
Passwords

_____ computers operates essentially by counting
Digital computer

Principles of good Programming does not include _____.

Viability

Every optional argument in the procedure definition must specify a/an _____ value which must be a constant expression.
Default

Which of the following Loop structure is not supported by VB.Net? _____
Do While

A computer is capable of all the following EXCEPT.
destroying input data

Which of the following can be seen in the front of the system unit? _____
All of the above

In the world today, most of the computers are :
Digital

_____ computer is a medium sized computer
Mini

Which type of computers measures only?
Analog computer

LAN stands for _____
Local area network

Which part of the computer is directly involved in executing the instructions of the computer program?
The processor

In which type of computer are data represented as discrete signals?
Digital computer

ALU and Control Unit jointly known as
CPU

Physical structure of computer is called:
Hardware

Computer system that attempts to gain the advantage of both the digital and the analog elements is known as ____
Hybrid

_____ computers operates essentially by counting
Digital computer

A modem is connected to:
a telephone line

_____ computers are computers designed to handle wide range of problems.
General-purpose computers

The following are application areas of Computer in the Military EXCEPT.
Auditing Operations

One hertz of a processor speed is Equivalent to how many clock ticks?
1 clock tick

The second generation of CPUs consist of _____ number of transistors.
13400

Which of the following Sections of a Decision table contains a list of all possible actions which could apply for a given combinations of conditions?
Action Stub

_____ language is capable of producing the most efficient program as far as storage requirements and operating speeds are concerned.
Machine language

The following are Examples of Desktop publishing package EXCEPT.
Paradox III

Computer programming languages can be classified into the following categories EXCEPT.
Intermediate language

The command statement deals with the following EXCEPT.
Disk scheduling

The operating system is responsible for the following activities in connection with process management EXCEPT.
Execution of processes

_____ ensure that a process can only execute within its own address space.
Memory addressing hardware

Which of the following is NOT a stage in the compilation process?
Systematic analysis

Computers can be infected with virus through the following medium EXCEPT.
RAM Chips

The following are application areas of Computer in Government EXCEPT.
Auditing Operations

Which of the following programming languages is said to be machine independent?
High level language

In visual Basic the Code window contains the following sections EXCEPT.
User control section

Which of the following is used to create, edit, save and print reports?
Word processor

A computer is capable of all the following EXCEPT.
destroying input data

_____ is an event driven language which has some features of Object-Oriented Programming.
Visual Basi

_____ is a computer program that accepts a source program in one high-level language, reads and translates the entire userâ€™s program into an equivalent program in machine language.
Compiler

Which of the following data processing method is noisy, hazardous, error prone and untidy?

Mechanical method

_____ computers are computers designed to handle wide range of problems.

General-purpose computers

The following are application areas of Computer in the Military EXCEPT.

Auditing Operations

One hertz of a processor speed is Equivalent to how many clock ticks?

1 clock tick

The second generation of CPUs consist of _____ number of transistors.

13400

Which of the following types of instructions allow the computer to change the sequence of execution of instruction, depending on conditions built into the program by the programmer?

Logic instructions

Which of the following is NOT a class of error in computer programming?

Typographical errors

Which of the following is a Digital Equipment?

Cell phone

Which of the following is often used in most text mode to perform block operations like mass deletion and insertion?

Control Key

A computer infected by virus can experience the following EXCEPT

Over heating

_____ computer attempts to gain the advantage of both the digital and the analog elements in the same machine.

Hybrid computer

_____ assists the CPU in its number-crunching activities.

Math Coprocessor Slot

_____ is a program that accepts program in a source language, reads, translates and executes it, line by line into machine language.

Interpreter

The computer understands and executes only _____ programs.

Machine language

Which of the following programming languages is said to be machine independent?

High level language

1. _____ comprises those media through which data is fed into the computer.

Output unit

Storage unit

--->> Input unit

Processing unit

2. _____ is an Auxiliary equipment which Stores electrical energy when the public electricity line is seized?

Air conditional

--->> UPS

Voltage Stabilizer

Transformer

3. Depending on their flexibility in operation, computers are classified as _____ and _____

Digital computer and Analog computer

Main-frame and Micro-computer

--->> Special-purpose computer and General-purpose computer

Hybrid computer and Mini-computer

4. _____ operating system allows more than one active user program to be stored in main memory simultaneously.

Network operating system

Real-time operating system

Distributed operating system

--->> Multiprogramming operating system

5. _____ Is NOT a CPU brand name.

IBM

AMD

--->> Pentium

Intel

6. All the following are examples of areas where General-purpose computers are employed EXCEPT.

Banking

--->> Airplane tracking

Inventory control

Manufacturing scheduling

7. _____ generation of computer ranges from 1954 to 1962.

first generation

--->> second generation

third generation

fourth generation

8. Which of the following computers represent its variable in the form of digits?

Analog computers

Micro Computers

General-purpose computer

--->> Digital computers

9. Which of the following computers make use of microprocessor chip as the main data processing unit?

Mini computers

Macro computers

Mainframe computers

--->> Micro computers

10. Which of the following is NOT a major division of an intelligent computer keyboard?

--->> Alternate key

Alphanumeric keys

Function keys

Numeric keys

1. Which one of the following is NOT a type of scanner?

Sheetfed Scanner

--->> Autographic Scanner

Flatbed Scanners

Hand Scanner

2. Which of the following keys activates the numeric keypad?

CapsLock Key

Alternate Key

Alternate Key

--->> NumLock Key

3. Which of the following programs acts as an interface between a user of a computer and the computer hardware?

System software

--->> Operating system

Utility software

Language Translator

4. Some of the high-level programming language introduced during the second generation of computer includes the following EXCEPT.

--->> JAVA

FORTTRAN

ALGOL

COBOL

5. The following are disadvantages of personal computers EXCEPT?

It is very fragile

Leads to increased rate of unemployment

Costly to maintain

--->> Very portable

6. Which of the following is NOT among the properties of a computer virus?

can be Polymorphic

can corrupt files randomly

can reboot the computer when a file is running

--->> can result to Bluescreen of death

7. _____ does all the PC's thinking and runs the programs (series of instructions) that you request.

Hard Disk Drive

RAM

Transistors

--->> Central Processing Unit

8. _____ is your computer's main permanent storage unit, holding large amount of data and programs.

Floppy Disk

--->> Hard Disk Drive

Compact Disk

Diskette

9. _____ is not among the components of the front of the system unit.

Reset button

Light

--->> Expansion Slots

Floppy Disk Drive

10. Which of the following consists of a pointing device, which is very sensitive to movements?

Scanner

--->> Mouse

Keyboard

Pen drive
