

Which input device is used for the same purposes as a mouse and is popular on laptop computers?

Track Ball

10/10

All but one are examples of word processing.

MS Access

One of these is not an example of spreadsheet

Autocad

Which of the following is a method of opening a file or folder?

All of the options

One of these is the function of operating system

All of the options

One of these is not among the categories of operating system.

None of the options

One of these is not a database model.

Democratic

What is a collection of information in a row representing one object called?

Record

What is a collection of information organized to facilitate easy access called?

Database

One of these is an example of DBMS

Postgress

The range of different types of things people do at work is called ?

Task variety

Which one is an example of Presentation Software?

Astound

Devices that return processed data, that is information back to the user is called what devices?

Output

All but one are examples of word processing.

MS Access

One of these is not an Operating System.

Excel

The most widely accepted as a common and possibly the most dangerous aspect of using a computer is?

Stress

The fulcrum of modern day developments can be ascribed to which term?
ICT

What is a program designed by a computer programmer (malicious hacker) to do a certain unwanted function called?
Virus

what type of an attack is can attackers deny service to individual victims, such as by deliberately guessing a wrong password 3 consecutive times?
Denial of Service Attacks

The range of different types of things people do at work is called ?
Task variety

One of the concerns of ICT is -----?
Competition

Common uses of the Internet includes
All of the options

A study of threat detection and defense is called computer -----?
Security

One of these is not a security measure.
Coding

What type of an attack is launched by using third party computer?
Indirect Attacks

Liquid Crystal Display and Cathode Ray Tube are types of which computer device?
VDU

Which components are added to computers to increase their capabilities?
Cards

Operating Systems falls under what type of software?
System

What refers to parts of the computer that have a material form?
Hardware

Dot matrix, inkjet, and laser are types of which computer device?
Printer

One of these is not among broad classification of computer software.
Powerpoint

The process of starting a computer is called what?
Bootting

Which hardware device allow you to transfer pictures and photographs to your computer?
Scanner

Where is software stored?
Disk

One of these is the name of computer company
IBM

Which memory did the computer uses to temporarily store the information as it is being processed?
RAM

Which of the following is a method of opening a file or folder?
All of the options

The processing of closing all the files and switching off or the components of computer is known as what?
Shutdown

One of these is a version of Windows Operating System.
Windows 98

The process of keeping copies of files in case of eventuality is known as what?
Backup

The first Computer does not have which of the following options?
Operating System

What is a collection of information in a row representing one object called?
Record

What is a collection of information organized to facilitate easy access called?
Database

List of commands in computer software is known as what?
Menu

All but one are examples of word processing.
MS Access

One of these is not an Operating System.
Excel

Computer that is dedicated to the task of storing and retrieving large amounts of data for distribution to others is what?
Server

A computer system is made up of what and what?
Hardware and Software

Classifying computer base on size include all but one of the following
Analog

What is embedded computer systems?
general purpose CPUs that are a part of a machine or device.

What is the basic functions of computer?
Store and manipulate information

What is called the physical component or materials on which data are stored?
Storage Media

What term is used for the most powerful computer available at any time.
SuperComputer

The size of a file is measured in what unit?
Byte

Which company is the producer of pentium processor?
Intel

Which memory did the computer uses to temporarily store the information as it is being processed?
RAM

1. Which memory did the computer uses to temporarily store the information as it is being processed?

--->> RAM

ROM

CD ROM

Memory Card

2. Which components are added to computers to increase their capabilities?

Mouse

Printer

--->> Cards

Keyboard

3. Which hardware device allow you to transfer pictures and photographs to your computer?

Photo

Printer

Monitor

--->> Scanner

4. Liquid Crystal Display and Cathode Ray Tube are types of which computer device?

Keyboard

Mouse

--->> Monitor

CPU

5. What refers to parts of the computer which do not have a material form, such as programs, data, protocols?

Softcopy

--->> Software

Hardware

Hardcopy

6. Where is software stored?

Mouse

--->> Disk

Monitor

CPU

7. CPU, Mouse, Keyboard , Monitors are the examples of?

Software

--->> Hardware

Softcopy

Electronics

8. Which term stands for modulate and demodulate?

CPU

IBM

--->> MODEM

USB

9. What is used to store information in computer?

Bit

Byte

--->> Disk

Drive

10. What is called the physical component or materials on which data are stored?

hardcopy

device

--->> Storage Media

Icon

1. One of these is not a database model.

Object models.

Relational

--->> Democratic

Hierarchical

2. Animation types includes all but one

Audio Visual Interleave's .avi

--->> Sun's .au

Microsoft's Media Player.wmv

Apple's Quick Time .qt,

3. Two types of computer graphics are _____ and bitmapped

png

jpeg

--->> vector

RGB

4. All but one is not audio file extension recognized in computer system.

.wav

.au

.snd

--->> .edu

5. Which among these is not one of the three main bitmapped format graphics used on the Internet?

.gif

.jpeg (.jpg)

.png

--->> xml

6. One of these is not a DBMS

Oracle

--->> Lotus

DB2

MySQL

7. The row and column intersect at where in spreadsheet?

Cell

--->> Cell

Fell

Bell

8. What is the type of computer software designed for the purpose of managing databases based on a variety of data models?

Spreadsheet

--->> DBMS

Presentation

Graphics

9. An example of desktop publishing application is?

--->> Ms Publisher

Ms Access

Ms Excel

Ms Project

10. The computer screen is made up of tiny dots called what?

--->> Pixels

Resolution

Pictures

Images

1. One of these is not an example of spreadsheet

--->> Autocad

Excel

Quattro

Lotus

2. What is a collection of information organized to facilitate easy access called?

MS Access

--->> Database

Table

Record

3. Application dedicated for financial and statistical operation is known as what?

--->> Spreadsheet

Wordprocessor

Sybase

Powerpoint

4. One of these is the function of operating system

Disk Access and File Systems

Multitasking

MemoryManagement

--->> All of the options

5. What is a collection of information in a row representing one object called?

--->> Record

Field

Table

Database

6. Database object include all but one

Table

Report

Form

--->> Book

7. One of these is not among the categories of operating system.

Real-time operating systems

Embedded Systems

All of the options

--->> None of the options

8. All but one are examples of word processing.

MS Word

Word Perfect

--->> MS Access

Word Pad

9. The BIOS is stored where in the computer?

RAM

--->> ROM

Hard Disk

CD ROM

10. The row and column intersect at where in spreadsheet?

Cell

--->> Cell

Fell

Bell

CIT202 7/10

One of these is not among broad classification of computer software.
MODEM

Which company is the producer of pentium processor?
Intel

One of these is not among broad classification of computer software.
POWERPOINT

A computer system is made up of what and what?
Hardware and Software

Where is software stored?
Disk

One of these is the name of computer company
IBM

What is used to store information in computer?
Disk

Which hardware device allow you to transfer pictures and photograph to your computer?

Scanner

Computer that is dedicated to the task of storing and retrieving large amounts of data for distribution to others is what?

Server

What is embedded computer systems?

general purpose CPUs that are a part of a machine or device

Liquid Crystal Display and Cathode Ray Tube are types of which computer device?

Monitor

What is the physical component or materials on which data are stored?

Storage Media

The process of starting a computer is called what?

Bootting

Which Company is the producer of Pentium processor.

Intel.

Which hardware device allow you to transfer pictures and photographs to your computer.

Scanner

Dot matrix, inkjet and laser are types of which computer device.

Printer

The process of starting a computer is called What.

Bootting

What refers to the part of the computer that have a material form

Hardware

Which hardware device allows you to transfer pictures and photographs to your computer.

Scanner

A computer system is made up of what and what?

Hardware and software

Operating System falls under what type of software.

System

Which components are added to computers to increase their capabilities?

Cards

What is called the physical component or materials on which data are stored?

Storage Media

What refers to parts of the computer that have a material form?

Hardware

Classifying computer base on size incluude all but one of the following

Analog

The process of starting a computer is called what?
Booting

Liquid Crystal Display and Cathode Ray Tube are types of which computer device?
VDU

Which hardware device allow you to transfer pictures and photographs to your computer?
Scanner

Which memory did the computer uses to temporary store the information as it is being processed?
RAM

Which term stands for modulate and demodulate?
MODEM

What is the basic functions of computer?
Store and manipulate information

- 1) Database objects include all but one - BOOK
- 2) Prevalent language - ENGLISH
- 3) One of these is not an example of spreadsheet - AUTOCAD
- 4) Example of DBMS - POSTGRESS
- 5) Applications with fixed deadline - RTOS
- 6) Information in a row representing an object - RECORDS
- 7) Presentation software - ASTOUND
- 8) Sybase is an example of - DBMS
- 9) The row and columns intersect at where - CELL
- 10) Applications dedicated for financial/statistical operation-
SPREADSHEET
