CIT204
=====

1. _____ is an example of major software development that occurred with the first generation computers.

Visual Basic

--->> FORTRAN

PROLOG

Vue Javascript

2. The second generation computer is also known as _____

--->> Assembly Language

High-level language

Micro-computing

Natural Language processing

3. _____ Computer can process both continuous and discrete data.

Analogue

General Purpose

--->> Hybrid

Digital

4. Fourth generation computers also saw the development _____

Grid Computing

Embedded Computing

internet

--->> GUIs, the mouse and handheld devices

5. The computers that used vacuum tubes are known as _____ computers.

Second generation

Third generation

Fourth generation

--->> first generation

6. _____ is the full meaning of FORTRAN

Fourier Series

Formula One

--->> Formula Translation

Formula Interpretation

7. What computer generation promotes the art of Artificial Intelligence?

--->> Fifth

Third

Fourth

first

8. What is GUI?

graph Intelligence unit

graph ploter

--->> graphic user interface

graph processing unit

9. The storage capacity of _____ computer is very low

Super

--->> Micro

Mainframe

Mini

10. _____ computers introduce the use of Electronic circuitry characterized by the use of transistors.

--->> Second generation

Third generation

Fourth generation

first generation
