

NOUN EXAMS

For a machine to be a server, it must have the following capabilities except ____
Higher physical size

The following are part of the CPU except ____
registrars

_____ is a very useful tool that helps to create multiple copies of a document like letters, invitations, circulations etc with small differences in them.
Mail merge

_____ Computer can process both continuous and discrete data.
Hybrid

The main reason why digital computers are more popular than analogue computers is \$, - | ..
easy programming

_____ performs actions essential for protecting, guiding, securing, and storing information or data appropriately in the system
Utility software

A regular keyboard has many keys?
105

_____ is the full meaning of FORTRAN
Formula Translation

The major components of the computer system include all except \$, - | .
primary

The two most common input devices of Computer System are _____.
a keyboard and the mouse

9/10

Computer memory are classified into _____ and _____ memory.
Secondary and Primary

In a flow chart ____ represents a user response that directs the course flow from that point onwards
action symbol

_____ is a connector at the back of the computer where you plug in an external device
Port

A microcomputer runs on _____.
Direct Current

_____ is the memory unit that communicates directly with the CPU.
Primary

__ is the delivery of learning content and materials to learners in digital form via a variety of technologies

electronic learning

The following procedures are followed while writing a computer program except ____
Determining progress objectives

____ displays system components, such as printers, control panel and taskbar
Program

The input devices are grouped into ____
Four

____ are the temporary storage areas for instructions or data within the processor.
Registers

5/10

Examples of Utility Software include all EXCEPT
anti virus

DirectX, OpenGL, OpenAL all fall under the what category of operating system?
Multimedia

Animation editor, 3D computer graphics, Video editing, Image processing belong to what category of software?
Graphics

____ is the full meaning of FORTRAN
Formula Translation

The withdrawal of specific data from its stored position is called ____
Retrieval

Fourth generation computers also saw the development ____
GUIs, the mouse and handheld devices

The storage capacity of ____ computer is very low
Mini

The type of memory that can be written into once and cannot be erased is known as ____
Programmable Read-Only Memory (PROM)

Performance analysis, Revision control, Software configuration management belong to what category of software?
Software Engineering

The product of data manipulation is ____
information
