nsc102 List of Questions Latex formatted questions may not properly render Q1 The skin pigment that accumulates in the stratum corneum is �?��?��?� Keratin Carotene Melanin haemoglobin Q2 The skin pigment that is a polymer of an amino acid is called Melanin Carotene Haemoglobin Keratin Q3 The placenta that takes the form of a complete or incomplete band of tissue is called Discoid Diffuse Zonary Cotyledonary Q4 The type of placenta that is present in human being is called 1. Haemochoria Epitheliochorial Chondromochorial Endotheliochorial Q5 The type of placenta that maternal epithelium of the uterus comes in contact with the chorion is present in Birds Human O Dog O Cow Q6 The placenta maternal endometrial blood vessels are bare to their endothelium and these comes in contact with the chorion is Endotheliochorial Epitheliochorial Haemochorial Chondromochorial Q7 There are \$? \$ \$? \$ \$?\$. Types of placenta classification Six O Four Three O Two Q8 The spatial pattern of gene expression that reorganizes the mesoderm into groups of cells called Morula Cleavage Somites Patterning Q9 Examples of muscles with oblique arrangements are \$? \$\$\phi \phi ? \$\$\phi ? \$\phi ? \$\$\phi ? \$\phi ? \$\phi ? \$\phi ? Trapezius and Rhomboideus Rectus femoris and Temporalis Latissimus dorsi and Supinator Gluteus maximum and minimum Q10 The process by which the three germ tissue layers of the embryo are develop into the internal organs of the organism is called Differentiation Organogenesis Cleavage Oogenesis Q11 �?��?��?��?��?��?��?��?��?��?��?�.is important for determining which cells develop into which organs Gastrulation Patterning Cleavage Blastomeres Q12 There are \$?\$\$?\$\$?\$\$?\$\$?\$\$?\$\$?\$\$. mechanisms used by animals to ensure that only one sperm fertilizes a given egg. Four Three O Two Five Q13 \$?\$\$?\$\$?\$\$?\$\$?\$\$?\$\$?\$\$?\$\$?\$\$?\$\$?\$\$?\$...is the division of cells in the early embryo.

Q14 An increase in metabolic activity within the egg during fertilization is caused by

Zygotic DivisionMorulablastomeres

□ TT A1	lease
	orption
K+ Rele	
○ Ca++ R	elease
O15 The co	ephalic end of primitive streak in embryo is called
Prochor	
Yolk sac	
Primitiv	
Notocho	
Notochi	ли
O16 The er	nbryonic development phase whereby bilaminar germ disc acquires a third germ layer is known as
Morula	
Gastrula	
Trophol	
Morula	
Q17 The sp	occific defense system of human body has �?��?�components
O 6	
O 2	
0 4	
O 5	
	♦?♦♦?♦♦?♦♦?♦♦?♦♦?♦♦?♦is an antibody specific for one antigen produced by a single clone of B- Cells
Monocle	
Monocy	
Natural	
Active	
	♦?♦♦?♦♦?♦♦?♦♦?♦♦?♦♦?♦♦?♦♦?♦. are used to treat viral infections and certain Cancers
Cytokin	
O Interfero	
Perforin	
Histami	ne
	�?��?��?��?��?��?��?��?��?��?�. cells destroy abnormal body cells such as virus-infected cells and cancer cells.
Killer T	
Helper ?	
Perforin	
Macropi	hages
Q21 Exam	ples of muscle with twisted fibers are , pectoralis major
Tibialis	
Rectus f	
Trapezio	
Latissin	nas dorsi

Q28 Epithelium composed of two or more layers of cells with only the deepest layer in contact with the basement membrane is
Stratified epithelium.
Columnar epithelium
Columnar epithelium.
Simple epithelium.
Q29 A tissue that covers a surface, is one cell layer thick, and is composed of flat cells is
Simple squamous epithelium.
Simple columnar epithelium.
Ciliated epithelium
Simple cuboidal epithelium
Q30 Example of serous membrane is
© Epithelia
Periosteum
Pleura
O Synovial
0315 4 15 40000000000000000000000000000000
Q31 Smooth muscle fibres are �?��?��?�. in shape Rectangular
Cylindrical
© Spindle
© Circular
Q32 The nucleus of smooth muscle fibres are located �?��?�.
© Centrally
Posterioly Actorisate

Chromatid
chromatinGlycolipids
© Cytosol
Q43 The nuclear pores are made up of multiple proteins referred to as Nucleocontent
nucleoporins
Phospholipids
© Cytosol
Q44 The space between the cell membranes is called the
Endoplasmic reticulum
Perinuclear space
Potential space
O Dead space
Q45 The nucleus of mammalian cells has an average diameter of about
© 5 mm
◎ 5µm
○ 6 μm
○ 6 mm
Q46 The viscous liquid within the Nucleus is called ,
O Nucleoplasm
CytosolPhospholipids
Nucleous
Q47 The largest cellular organelle in animals is called
LysozomePlasma membrane
Nucleus
Cytoplasm
Q48 Mitosis is a form of cell division that takes place in
Sexual reproduction
Sexuality process
Genetic division
O Asexual reproduction
O40 a In vive calle are those that are $\Delta 2 \Delta \Delta 2 \Delta$
Q49 o In vivo cells are those that are ♦?♦♦?♦. Procaryotic cell
Within the cell
Within the cell
 Within the cell within the viral cell inside organism or cell

 Within the cell within the viral cell inside organism or cell Q50 In vitro cell indicate that the cell is located ♦? ♦ ♦? ♦ Within the organism within the viral cell Eucaryotic cell Q51 Cell was discovered by Robert Hooke Anton van Leeuwenhoek, Keith Moore Ganog Q52 One phase of metabolism is in which complex substances are broken down into simpler building blocks and energy is released Organization Responsiveness Growth Catabolism Q53 A patient with appendicitis usually has pain in the left-upper Left over b. right-lower Right lower
 Within the cell within the viral cell inside organism or cell Q50 In vitro cell indicate that the cell is located ♦? ♦ ♦? ♦ Within the organism outside organism Within the viral cell Eucaryotic cell Q51 Cell was discovered by Robert Hooke Anton van Leeuwenhoek, Keith Moore Ganog Q52 One phase of metabolism is in which complex substances are broken down into simpler building blocks and energy is released Organization Responsiveness Growth Catabolism Q53 A patient with appendicitis usually has pain in the left-upper Left over b. right-lower
 Within the viral cell within the viral cell inside organism or cell OSO In vitro cell indicate that the cell is located ♦? ♦ ♦? ♦ Within the organism within the viral cell Eucaryotic cell OSI Cell was discovered by Robert Hooke Anton van Leeuwenhoek, Keith Moore Ganog OS2 One phase of metabolism is in which complex substances are broken down into simpler building blocks and energy is released Organization Responsiveness Growth Catabolism OS3 A patient with appendicitis usually has pain in the left-upper Left over b. right-lower Right lower OS4 The word ♦??homeostasis ♦? ♦ is derived from ♦? ♦ ♦? ♦
 Within the viral cell within the viral cell inside organism or cell O50 In vitro cell indicate that the cell is located ♦? ♦ ♦? ♦ Within the organism outside organism within the viral cell Eucaryotic cell O51 Cell was discovered by Robert Hooke Anton van Leeuwenhoek, Keith Moore Ganog O52 One phase of metabolism is in which complex substances are broken down into simpler building blocks and energy is released Organization Responsiveness Growth Catabolism O53 A patient with appendicitis usually has pain in the left-upper Left over b. right-lower Right lower O754 The word ♦??homeostasis ♦? ♦ is derived from ♦? ♦ ♦? ♦ British Greek Latin
 Within the cell within the viral cell inside organism or cell Q50 In vitro cell indicate that the cell is located ♦?♦♦?♦ Within the organism within the viral cell Eucaryotic cell Q51 Cell was discovered by Robert Hooke Anton van Leeuwenhoek, Keith Moore Ganog Q52 One phase of metabolism is in which complex substances are broken down into simpler building blocks and energy is released Organization Responsiveness Growth Catabolism Q53 A patient with appendicitis usually has pain in the left-upper Left over b. right-lower Right lower Q54 The word ♦??homeostasis ♦?♦ is derived from ♦?♦♦?♦ British Growk Greek
 Within the cell within the viral cell inside organism or cell Q50 In vitro cell indicate that the cell is located ♦? ♦ ♦? ♦ Within the organism outside organism Within the viral cell Eucaryotic cell Q51 Cell was discovered by Robert Hooke Anton van Lecuwenhoek, Keith Moore Ganog Q52 One phase of metabolism is in which complex substances are broken down into simpler building blocks and energy is released Organization Responsiveness Growth Catabolism Q53 A patient with appendicitis usually has pain in the left-upper Left over b. right-lower Right lower Q54 The word ♦??homeostasis ♦? ♦ is derived from ♦? ♦ ♦? ♦ British Greek Latin German
 Within the viral cell within the viral cell inside organism or cell O50 In vitro cell indicate that the cell is located ♦? ♦ ♦? ♦ Within the organism outside organism within the viral cell Eucaryotic cell O51 Cell was discovered by Robert Hooke Anton van Leeuwenhoek, Keith Moore Ganog O52 One phase of metabolism is in which complex substances are broken down into simpler building blocks and energy is released Organization Responsiveness Growth Catabolism O53 A patient with appendicitis usually has pain in the left-upper Left over b. right-lower Right lower O754 The word ♦??homeostasis ♦? ♦ is derived from ♦? ♦ ♦? ♦ British Greek Latin
 Within the cell within the viral cell inside organism or cell QSO In vitro cell indicate that the cell is located ♦?♦♦?♦ Within the organism within the organism within the viral cell Eucaryotic cell Elucaryotic cell Q51 Cell was discovered by Robert Hooke Anton van Leeuwenhoek, Keith Moore Ganog Q52 One phase of metabolism is in which complex substances are broken down into simpler building blocks and energy is released Organization Responsiveness Growth Catabolism Q53 A patient with appendicitis usually has pain in the left-upper left over b. right-lower Right lower Q54 The word ♦??homeostasis ♦?♦ is derived from ♦?♦♦?♦ British Greek Latin German Q55 The part of the upper limb between the elbow and the wrist is called the

O Hand
Q56 A Sagittal plane through the midline of the body that divides the body or any of its parts into right and left halves. Lateral Frontal Coronal Median
Q57 A horizontal plane that divides the body or any of its parts into upper and lower parts is referred to as �?� Axial Coronal Lateral Median
Q58 A vertical plane that runs from side to side and divides the body or any of its parts into anterior and posterior portions is called Lateral Coronal Transverse Plane Axial
Q59 The basic processes of life are categorized into Four Six Three Five
Q60 Maintenance of relatively constant internal environment is called Haemostasis Equilibrium Stbility Homeostasis
Q61 One phase of metabolism in which complex substances are broken down into simpler building blocks and energy is released is
Q62 The word �??homeostasis�?� is derived from Greek Latin Sanskrit German
Q63 A patient with appendicitis usually has pain in the Left-lower Right-lower Left-upper Right-upper
Q64 The part of the upper limb between the elbow and the wrist is called the Arm Inferior Arm Forearm Lower Arm
Q65 The upper ventral cavity is also called the Chest Cavity Abdominal Cavity Adrenal Cavity Cranial Cavity
Q66 The lower part of the ventral cavity can be divided into portions. Four Two Six Three
Q67 An infection of the appendix can rupture its wall, releasing bacteria into the peritoneal cavity, resulting in
Q68 The dome shaped respiratory muscle is the Trachea Ribs Larynx Diaphragm
Q69 The main body cavities are andcavities Operal and Caudal Distal and Cranial Ventral and Dorsal

Ventral and Proximal
Q70 The foot is part of the extremity. Caudal Cranial Distal Proximal
Q71 The pelvic cavity is bounded cranially by the Abdominal Cavity Sacrum Pelvis Diaphragm
Q72 The lower portion of the cranial cavity houses the Brain Nerves Spinal cord Vessels
Q73 The abdominal cavity is bounded laterally by the Body wall Pelvis Diaphragm Trachea
Q74
Q75 A vertical plane running side to side, dividing the body or any of its part into anterior and posterior portion is called
Q76 A horizontal plane that divided the body or any of its parts into upper and lower parts is called
Q77 The shoulder blades are located on the side of the body. United Lateral Dorsal Distal
Q78 The little toe is located at side of the foot. Medial Inferior Proximal Lateral
Q79 The hand is part of the extremity Inferior Ventral Medial Superior
